PRODUCT

How to use

Cleaning

- Use this powder as a mild abrasive to clean cooker tops, sinks and tiles. Sprinkle directly onto the surface and wipe over with a damp sponge or cloth. For extra cleaning power, mix with cooking salt in equal quantities and add a small amount of water to make a cleaning paste. Apply to the surface and wipe off.

Deodorising

- To deodorise carpets and upholstery, sprinkle Bicarbonate of Soda and leave for at least an hour, preferably overnight. Then vacuum to leave fresh smelling, perfume free fabric. To deodorise fridges, simply remove the top of the packet and place at the back of the fridge. When odour starts to return, replace the pack. Empty the spent packet into plug holes or drains followed by hot water to help keep them clean. Or alternatively you can use it as an abrasive cleaning paste. Use bicarbonate of soda in waste bins, dustbins and pet litter trays to reduce odour

Sinks

- Pour two or three tablespoons of Bicarbonate of Soda followed by an equal amount of White Vinegar down plug holes to keep sinks and baths clean and odour free. The fizzing action will help to remove built up debris. Flush with hot water after 10 minutes.

How it is promoted

- Cleans and freshens around the home.

Warnings

- Keep out of the reach of children.
- Users with sensitive skin should wear gloves.
